## About Aaghaz

To bring out the hidden and innovative talent in college through their work by our publication. Student's thought, ideas, innovation publish in the AAGAZ magazine. Creativity is the single most desirable attribute of an engineer. The general impression of engineers is doing things by the book, rather than writing the rules.

However, nothing could be further from the truth. Today's engineers have more opportunities to be creatively engaged than most. With growing technology, the scope of innovation and its implementation has improved. Students often indulge in their books and don't let their imagination work. I would say that open up your mind and let it explore the worlds untouched. Being an engineer is not limited to being innovative or creative but it is a necessity for the improvement of the society and that is the primary job of an engineer.
