

Sample STATEMENT OF PURPOSE by IOO ABESEC

I, XYZ, a student of ABES Engineering College Ghaziabad (ABESEC), believe, "education is the passport to the future, for tomorrow belongs to those who prepare for it today." I feel that whatever I have achieved is because of being in ABESEC, where a child is nurtured, encouraged and polished to face the outside world confidently and smartly by inculcating their problem-solving attitude. Choosing a career is one of the most important decisions one has to make in his life, however, I feel myself in a better situation because of my parents and the institution. They both have been instrumental in imbibing all good values and a sense of moving ahead towards the career of my choice. I deeply acknowledge the support and understanding of everyone who has stood by me.

Having chosen the "Science" stream after class 10th, I had clearly made a choice to study Engineering from a prestigious college which would further enhance my competences. I have always been inquisitive for studying science subjects like Math, Physics, and Chemistry which are otherwise considered "tough". Engineering has always fascinated me. I often dream of working as a top-class engineer in topmost IT firms. Being innovative is the key to being a good engineer and I am a very innovative person.

Performing experiments with all Mechanical objects has always been my forte. I believe one has to be dynamic and active and keep experimenting to keep up the charged drive to be an engineer. I have the vision and determination to do well in the stream I choose to do. I want to explore and expand my engineering skills and abilities. I love sports, especially cricket and basketball. I am passionate about vintage cars and play station games. I am also an avid reader of science fiction books.

I have learned to be a diligent worker as I have grown up watching my father working so hard for developing and expanding his business. In the future I also wish to be upgraded in the field I would eventually pursue. I have appeared for general entrance exams too to get hand-on knowledge of the kind of papers that are set.

Given the right opportunity, I am confident of the right future ahead and waiting to tread on the path to success. I believe that destiny can also be made by one's grit, determination and having faith in oneself.
